Specification of the char DOM structure in DIVALite

List of char constituents

drag* contains all the elements of char:

resize* is the area for resizing the char at bottom feet (optional if drag is also used for resizing)

click* area where the character can be clicked, double-clicked, shiftclicked

balloon* area where the text is printed

pict* where a .gif, .png can be displayed

img* is not a div but the container of the animation .png files

where * stands for number 1 to n of character on page: pict1, pict2, pict2 etc.

div drag* is used to drag the char (and to resize ?)

all elements in drag have relative position to posx, posy of drag*

all elements in drag are resized when char is resized
